

4th Annual Hugh Kopel Memorial Pediatric Dentistry Symposium
September 7, 2018
8:30-4:30 – 7 Units CE
Rancho Dental Continuing Education Program

Jeanette MacLean, DDS

Presents:

Be SMART: Improve Your Practice with Silver Diamine Fluoride and Glass Ionomer Cement
&
Less is More: Minimally Invasive Cosmetic Treatment Options for Enamel Defects

Dr. Jeanette MacLean is a Diplomate of the American Board of Pediatric Dentistry, Fellow of the American Academy of Pediatric Dentistry, owner of Affiliated Children’s Dental Specialists in Glendale, Arizona, and mother of two. She received her dental degree, with honors, from the University of Southern California in 2003 and completed her specialty training in pediatric dentistry in 2005 at Sunrise Children’s Hospital through the University of Nevada School of Medicine. Dr. MacLean has become an internationally recognized advocate and expert on silver diamine fluoride, appearing in newspapers, magazines, television, and continuing education lectures on this hot topic. Most notably, she was featured in the July 2016 New York Times article “A Cavity Fighting Liquid Helps Kids Avoid Dentists’ Drills,” which brought national attention to the option of treating cavities non-invasively with silver diamine fluoride.

Be SMART: Improve Your Practice with Silver Diamine Fluoride and Glass Ionomer Cement

Target Audience:

Dentists, Dental Hygienists, Dental Assistants, Front Office/Auxillary

Course Description:

Silver Diamine Fluoride (SDF) is a revolutionary approach to combating caries in a non-invasive manner. Since its 2014 FDA clearance in the United States and a widely publicized 2016 feature in the New York Times, there has been tremendous interest surrounding the use of SDF from patients and dentists. Learn the principles of case selection, informed consent, treatment planning, and a clinical protocol for SDF. Learn how to restore cavities in a quick, effective, and painless way using SDF, Glass Ionomer Cement, and stainless steel crowns, known as Silver Modified Atraumatic Restorative Treatment (SMART) and the Hall Technique. Find out how offering minimally-invasive options like SDF, SMART, and Hall can attract new patients, improve patient satisfaction, and increase internal marketing and word of mouth referrals to your practice, while improving oral health and increasing access to care.

Learning Objectives:

- Describe the evidence for using SDF and SMART to treat and prevent dental caries
- Review informed consent and treatment planning for SDF and SMART
- Demonstrate proper documentation, coding, and billing for SDF and SMART
- Describe case selection, materials, and clinical protocol for SDF, SMART, and Hall Technique

Less is More: Minimally Invasive Cosmetic Treatment Options for Enamel Defects

Target Audience:

Dentists, Dental Hygienists, Dental Assistants

Course Description:

Unightly congenital enamel defects and acquired white spot lesions can be troublesome for many patients. Historically, these blemishes have been treated with invasive and costly resin bondings and veneers. Dealing with enamel defects can prove particularly troublesome for young patients, which when left untreated, often become a source of embarrassment for the patient. Or worse, some lesions may progress to cavitations, particularly post-orthodontic white spot lesions. In this course, Dr. Jeanette MacLean, an advocate for minimally invasive dentistry, will teach you three simple and painless options to manage enamel defects. MI Paste, ICON Resin Infiltration, and etch/bleach seal can improve or even completely reverse the appearance of congenital enamel defects and white spot lesions while preserving tooth structure and repairing the patient's natural enamel.

Learning Objectives:

- Describe the evidence for using MI Paste, ICON Resin Infiltration, and Etch/Bleach/Seal
- Review informed consent, coding, and billing
- Describe case selection, materials, and clinical protocol for each procedure
- Review the pros and cons for each technique

Location: Los Amigos Golf Course
7295 Quill Drive
Downey, CA 90242

From Old River School road, head West on Quill Dr. and Follow the road around to the guard booth. Inform the guard that you are attending the Dental Seminar at the golf course and you will be instructed where to park.

Light Continental Breakfast and Lunch included.

Rancho Los Amigos National Rehabilitation Center Department of Dentistry is an accredited CE provider by the California Dental Board

Dentists:	\$140
Dental Assistants and Hygienists:	\$100
Residents & Students:	\$ 30

Note: Dentists, Dental Assistants, and Hygienists may take \$15.00 off each course if registering for 2 or more courses. See Registration Form.
